DESCRIPTION

The Sunseeker Manhattan 68 is one of Sunseeker's most successful modern flybridge yachts, combining contemporary design, strong performance and exceptional use of space. This 2022 example is presented in very good condition and benefits from sensible ownership, having accumulated approximately 700 engine hours. The vessel has primarily been used for longer cruising trips over shorter periods rather than intensive daily use, which is reflected in the excellent presentation of the interior and overall condition throughout.

Powered by twin MAN V8-1200 engines, the yacht delivers confident performance with smooth cruising capabilities and impressive top-end speed. The Manhattan 68 is well known for its balance between sporty handling and long-range comfort, making it equally suited to extended cruising or relaxed Mediterranean day use.

This particular yacht is equipped with the highly desirable Beach Club / beach platform configuration, creating a generous water-level social space ideal for swimming, launching water toys or simply enjoying time at anchor. Combined with the spacious flybridge, large cockpit dining area and bright main saloon, the yacht offers multiple areas designed for entertaining and relaxation.
